

Big, Sweet Tomatoes!

Food Security and Productive Sanitation

Wednesday 19 August 2009, 12:45 – 13:45, Room K12
World Water Week, Stockholmsmässan, Stockholm, Sweden

Convenors: IFAD, CREPA, SEI.

Event Description

The need for increased crop yields in Africa is driving farmers' demand for fertiliser. Productive sanitation can play a key role in meeting this demand. This event will have a special focus on the IFAD-funded productive sanitation project in Niger which shows how agricultural productivity can be a driver for sanitation.

Programme

Introduction: Setting the Scene for Enhanced Food Security with a Focus on the African Context

Dr. Elisabeth Kvarnström, Node Development Manager, EcoSanRes Programme, SEI, Sweden

Mainstreaming Productive Sanitation Systems in the Agricultural Sector

Mr. Laurent Stravato, Technical Adviser, Water and Sanitation, IFAD, Italy

Agricultural Productivity as a Driver for Sanitation: The IFAD funded Project in Aguié, Niger

Mr. Linus Dagerskog, Project Coordinator AP-Aguié, CREPA HQ, Burkina Faso

Potential of Productive Sanitation Systems in Niger

Prof. Moussa Baragé, Head of Department, Faculty of Agronomy, Abdou Moumouni University, Niger

Tools for Nutrient Recycling and Soil Enhancement

Ms. Anna Richert, Director, Richert Miljökompetens, Sweden

Discussion: The Potential of Productive Sanitation

Moderator: *Dr. Elisabeth Kvarnström*
